The Program aims to ensure safe, reliable, and resilient water supply services in targeted rural areas throughout Georgia. The Program is expected to benefit approximately 150,000 people through the expansion and rehabilitation of water supply infrastructure in at least 100 rural settlements while strengthening institutional arrangements, governance, and sustainable operation of the rural water sector.

The Program is financed using ADB's Results-Based Lending (RBL) modality. Loan disbursements are linked to the achievement of agreed Disbursement-Linked Indicators (DLIs). An independent consulting firm will be engaged to verify the achievement of applicable DLIs and sub-indicators in accordance with the approved DLI Verification Protocols.
